Learning Activity Highlights

What's the Difference Between Needs and Wants? -

Whether it's food, rent, or internet, every household has many different expenses they must cover. How do you figure out which are the most important? In this activity, students explore the difference between needs and wants, and learn the importance of opportunity cost.

Borrowing and Credit - When you look at the price tag for a house or car, you may wonder: how will I ever earn enough cash to pay for that? The answer is, most people don't usually pay for these items in cash, but use credit instead. In this module, students learn how and when credit is used, and when it might be a smart financial decision.

Good and Bad Money Decisions - Some decisions are easier to make than others. When it comes to money, how do you evaluate which decision is a good one? In this activity, students look at real-life budgetary decisions, and explore what the consequences might be.
